

McIntosh®

LEGENDARY PERFORMANCE

Retail Price List. **Effective** 01 February 2023.

MHT300

The McIntosh MHT300 Home Theater Receiver (or AV Receiver or AVR) is an uncompromising 7.2 (or 5.2.2) channel home theater powerhouse sure to heighten your emotional connection to what you are watching. With support for breathtaking 8K/60Hz and 4K/120Hz video and leading home theater surround sound audio formats Dolby® Atmos and DTS: X™, plus delivering 120 – 150 Watts of legendary McIntosh power to your home theater speakers, the MHT300 will make your home theater dreams come true. ⓘ

MC451

The MC451 Dual Mono Amplifier joins the MC901 in offering the ultimate solution to bi-amping a loudspeaker. Like the MC901, the MC451 uses our Hybrid Drive™ technology that combines a separate vacuum tube and solid state amplifier onto one single chassis to produce the best possible sound performance from a bi-ampable speaker. ⓘ

MDA200

The MDA200 D/A Converter from McIntosh provides premium digital music capabilities. It can add digital music listening to an otherwise all analog home audio system, or it can also be a useful upgrade to an older D/A Converter that has become outdated and needs to be replaced so you can achieve better playback performance and enjoy current features. It is a stand-alone, outboard D/A Converter that can easily be added to home audio systems of various sizes, ages, and configurations. ⓘ

MI502

The MI502 2-Channel Digital Amplifier is a flexible component and welcome addition to a custom installed home audio or home theater system. It delivers world renowned McIntosh sound quality at a rate of 500 Watts into 8 Ohm speakers or 800 Watts into 4 Ohm speakers. It uses highly high-tech closed loop digital switching amplifiers and resilient power supplies that produce performance levels seldom heard in custom install audio. ⓘ
